

RIP CHANGE RESIN MOUNTING DISCS

Prevent loss, protect your resin holder discs and dramatically reduce resin bond change over times with Rip Change Resin Mounting Discs exclusive to WORX+.

Rip Change Resin Mounting Discs enable you to leave your resin pads set-up for the duration of the pad life. Simply set-up your resins on the Rip Discs and then attach the Rip Discs to your resin holder discs. To change resin step or grit size, simply peel off the Rip Disc along with the resin pads still attached to it. No screw driver or scraper required.

FEATURES & BENEFITS:

- Protection of expensive resin holder discs from heat, foreign debris, floor treatment products and wear and tear.
- Eliminate loss of loose resin pads.
- Rapidly reduce resin pad change over time.

APPLICATION:

Floor polishing applications for walk behind machines.

SPECIFICATIONS:

Diameters to suit most popular floor grinder models.
